

Benefits of using Aspen 2 fuel

- Better for operator health – reducing the exposure to harmful exhaust emissions.
- Reduces impact wrench maintenance costs by 30%.
- Aspen fuel contains less harmful substances such as benzene, hydrocarbons and olefins.
- Aspen is mixed at 50:1 with a fully synthetic bio-degradable 2-stroke oil which contains as much as 60% renewable content.
- Eliminates the risk of damage to machinery from incorrectly mixed fuel/oil.
- Can be used in all types of modern two-stroke engines.
- Aspen also has the advantage that it is virtually odourless.
- Suitable for long-term use - won't degrade and can remain in the machine between operations.
- Aspen Alkylate Petrol emits substantially fewer substances, reducing the formation of ground level ozone which is harmful to humans, animals and plants.
- Better performance and a longer service life.
